Portable Automatic Satellite System
with built-in DVB for positive satellite identification

Model VQ2000
Operating Instructions
### IMPORTANT!

The satellite TV market is expanding and changing. The information in this manual was accurate at the time of printing. If your VuQube does not operate as outlined in this manual please call King Controls at (800) 982-9920 or visit our website at www.kingcontrols.com.

Please read this entire manual before using the VuQube.

The VuQube VQ2000 Automatic Satellite System provides simple, one-touch operation for easy access to all your favorite satellite TV channels. It is a full featured portable dish system with automatic satellite acquisition and satellite switching capabilities.

An optional Flex Install Kit with ladder mount bracket (KC# MB410 - sold separately) is available to allow semi-permanent installation on the rear ladder of your RV, but still provides the flexibility to remove the antenna for use as a portable (Fig. 1). The kit includes everything required to hard wire your RV for the VuQube: ladder mount bracket, power/controller cable, (2) coax cables, (2) cable entry cover plates and controller (Fig. 2).

The VQ2000 is compatible with the following satellite services:

- DIRECTV® Single Satellite
- DIRECTV Plus
- Dish Network™ Single Satellite
- Dish Network (Dish 500)
- Dish Network - HDTV (Dish 1000/1000a)
- ExpressVu
- ExpressVu HDTV

The VQ2000 includes 3 main components (Fig. 3).

- **Antenna Unit**: Placed in direct line of sight to the southern sky. The dish is covered by an enclosure for easy transport and protection from the elements.
- **Controller**: Activates the search mode and provides limited diagnostic functions using the status light.
- **Power Supply**: Supplies proper operating voltage to the VuQube.

The VuQube can be placed anywhere there is a clear view of the southern sky.
Note: A TV, satellite receiver, and program subscription are also required for satellite TV viewing (sold separately).

AVOID SHARP BENDS WHEN ROUTING COAX!
The VuQube Model VQ2000 Automatic Satellite System is factory pre-set for DIRECTV standard digital programming broadcast from the 101° W satellite.

If you also receive your local channels from DIRECTV’s 119 satellite or if you subscribe to Dish Network or ExpressVu programming, you must use the VuQube hand held controller to re-configure the antenna to work with your satellite service. Doing this will allow the VuQube to lock on the correct satellites to receive your programming and also enable automatic satellite switching via the receiver’s remote control for multi-satellite service.

Antenna configuration is a one time procedure that must be completed before using your VuQube antenna.

**ANTENNA CONFIGURATION PROCEDURE**

On pages 6-10, find your service and follow the instructions in the box.

DIRECTV ANTENNA CONFIGURATION

Single Satellite 101

The VuQube is factory pre-set for the DIRECTV 101 satellite. Unless the antenna has been configured for another option since leaving the factory, **PERFORM STEP 5 ONLY**.

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button **16** times. The status light starts rapidly flashing green and red.

3. Press and hold the ▲ button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. Set your receiver for round dish-1 satellite (do this through the receiver’s satellite set-up menu screens). Configuration is complete.

DIRECTV Plus (satellites 101, 119)

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button **8** times. The status light starts rapidly flashing green and red.

3. Press and hold the ● button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. Set your receiver for oval dish-2 satellites (do this through the receiver’s satellite set-up menu screens). Configuration is complete.
**DISH NETWORK ANTENNA CONFIGURATION**

**Single Satellite 119**

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button **20** times. The status light starts rapidly flashing green and red.

3. Press and hold the ▲ button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. After you have successfully configured the antenna, you must configure your receiver for mobile use. To configure your receiver, **GO TO PAGE 12 AND RUN THE CHECK SWITCH.**

**DISH 500 (satellites 110, 119)**

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button **12** times. The status light starts rapidly flashing green and red.

3. Press and hold the ● button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. After you have successfully configured the antenna, you must configure your receiver for mobile use. To configure your receiver, **GO TO PAGE 12 AND RUN THE CHECK SWITCH.**
DISH 1000 - HDTV

Dish Network HD programming is broadcast from 4 satellites (61,110,119,129). The 61 and 129 satellites broadcast identical programming. (The 61 is generally stronger in the eastern U.S. and the 129 in the western U.S.) The map below shows the approximate coverage for each satellite.

Your VuQube antenna can be easily configured to work with two different satellite trios (DISH 1000a: 61,110,119 or DISH 1000: 110,119,129). By choosing the appropriate trio that includes either the 61 or the 129 satellite based on where you are, you can receive all of your desired programming.

Configure your antenna for the chosen trio on page 9.

Note: You can switch trios later if you travel to another area of the country (see page 16).

SATELLITES 61 AND 129 COVERAGE MAP

Note: This map is an approximation only. Which trio works best in a given location may differ from what is indicated on the map.
DISH 1000 HD (satellites 110, 119, 129)

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 20 times. The status light starts rapidly flashing green and red.

3. Press and hold the button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. After you have successfully configured the antenna, you must configure your receiver for mobile use. To configure your receiver, GO TO PAGE 12 AND RUN THE CHECK SWITCH.

DISH 1000a HD (satellites 61, 110, 119)

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 16 times. The status light starts rapidly flashing green and red.

3. Press and hold the button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. After you have successfully configured the antenna, you must configure your receiver for mobile use. To configure your receiver, GO TO PAGE 12 AND RUN THE CHECK SWITCH.
BELL EXPRESSVU ANTENNA CONFIGURATION

Standard Digital (satellite 91)

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 8 times. The status light starts rapidly flashing green and red.

3. Press and hold the ▲ button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. After you have successfully configured the antenna, you must configure your receiver for mobile use. To configure your receiver, GO TO PAGE 12 AND RUN THE CHECK SWITCH.

HDTV (satellites 82, 91)

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 12 times. The status light starts rapidly flashing green and red.

3. Press and hold the ▲ button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

5. After you have successfully configured the antenna, you must configure your receiver for mobile use. To configure your receiver, GO TO PAGE 12 AND RUN THE CHECK SWITCH.
This page intentionally left blank.
1. Turn on the TV and satellite receiver.

2. On the VuQube controller, press and hold the ON button for **3 FULL SECONDS**.

   The antenna will lock onto the appropriate satellites before completing the search process.

   **After the satellites have been located and the acquisition process is complete, the status light will be steady green.**

3. On the receiver remote, press menu, 6, 1, 1.

4. Highlight Check Switch and press select.

5. Make sure Superdish and Alternate boxes are **NOT** selected.

6. Highlight Test and press Select.
The unit will perform a check switch test, and the dish will periodically move back and forth. (This process will take several minutes.)

7. When test is complete, a screen similar to one of the following should appear:

If indicated results are not obtained, go back to Step 3 and run test again. Contact King Controls if the check switch fails to load after 4 attempts.

8. Save the settings, exit to the main menu screen and wait for your programming to download.

9. **DISH 1000/1000a ONLY:** Verify your saved settings show your desired satellite trio (110, 119, 129 or 110, 119, 61). To switch trios, see page 16.

Configuration is complete.
1. Turn on the TV and receiver. “Searching for Satellite” or similar will appear on TV screen.

2. On VuQube controller, press and hold the ON button for 3 FULL SECONDS.

   Power light turns steady GREEN.

<table>

   a) flashes a variety of colors for about 30 seconds
   b) RED-flashing
   c) GREEN-flashing (may start flashing RED again)
   d) GREEN-steady

3. When the status light is steady green, select a channel or the program guide to view your programming. Enjoy! (DO NOT TURN THE VUQUBE OFF IF USING THE AUTOMATIC SATELLITE SWITCHING FEATURE.)

   Note: If the status light is steady GREEN and your programming does not appear, press the reset button on your DIRECTV receiver. If using Dish Network, hold the receiver power button in for 10 seconds to reset your receiver. Consult your receiver owner’s manual for further details. (Note that it may take several minutes for the guide to re-download.)

   When receiver reset is complete and the guide is downloaded, select a channel or the program guide to view your programming.
AUTOMATIC SATELLITE SWITCHING

1. After you have properly configured the VuQube antenna for your satellite service, the VuQube will automatically switch between satellites by simply selecting your desired channel using the receiver’s remote control.

Note: For better performance when using the automatic satellite switching feature, change channels by selecting your program from the channel guide rather than channel surfing.

It is common for the picture to pixel or display an error message when the antenna is switching between satellites, or the signal has been temporarily blocked. PLEASE BE PATIENT. THE PICTURE WILL RETURN.

If an error message appears for an extended period, selecting CANCEL may help clear the message more quickly.

Dish Network HD users: If you are unable to receive all of your HD programming, see Dish Network HDTV: Changing the Satellite Trio on page 16.
DISH NETWORK HDTV: Changing the Satellite Trio

IMPORTANT! Perform this procedure only if you are unable to receive all of your HD programming in a particular area of the country.

You cannot change trios if the antenna has not been initially configured for Dish 1000 or 1000a (see pages 8-9).

Dish Network HD programming is broadcast from 4 satellites (61,110,119,129). The 61 and 129 satellites broadcast identical programming. (The 61 is generally stronger in the eastern U.S. and the 129 in the western U.S.) The map below shows the approximate coverage for each satellite.

Your VuQube antenna can be easily configured to work with two different satellites trios (DISH 1000a: 61,110,119 or DISH 1000: 110,119,129) as you travel from one coverage area to another. By choosing the appropriate trio that includes either the 61 or the 129 based on where you are, you can receive all of your desired programming.

SATELLITES 61 AND 129 COVERAGE MAP

Note: This map is an approximation only. Which trio works best in a given location may differ from what is indicated on the map.
**61, 110, 119 TRIO (DISH 1000a)**

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 4 times. The status light starts rapidly flashing green and red.

3. Press and hold the ▲ button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF. **GO TO PAGE 12 AND RUN THE CHECK SWITCH.**

**IMPORTANT! YOU MUST RUN THE CHECK SWITCH AFTER SWITCHING TRIOS!**

---

**110, 119, 129 TRIO (DISH 1000)**

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 4 times. The status light starts rapidly flashing green and red.

3. Press and hold the ● button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF. **GO TO PAGE 12 AND RUN THE CHECK SWITCH.**

**IMPORTANT! YOU MUST RUN THE CHECK SWITCH AFTER SWITCHING TRIOS!**
If you have traveled a long distance since last performing a search, you can speed up acquisition time by setting the VuQube to start searching at one of four different elevations: 25°, 37°, 48° or 55°.

Find your location on the appropriate map for your service and choose the elevation closest to you. Then follow the instructions in the corresponding box on the next 2 pages.
CHANGE SEARCH ELEVATION TO 25°

1. On the VuQube controller, press and release the ON button.
   Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 8 times.
   The status light starts rapidly flashing green and red.

3. Press and hold the ON button for 4 seconds.
   The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

CHANGE SEARCH ELEVATION TO 37°

1. On the VuQube controller, press and release the ON button.
   Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 12 times.
   The status light starts rapidly flashing green and red.

3. Press and hold the ON button for 4 seconds.
   The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.
CHANGE SEARCH ELEVATION TO 48°

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 16 times. The status light starts rapidly flashing green and red.

3. Press and hold the ON button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

CHANGE SEARCH ELEVATION TO 55°

1. On the VuQube controller, press and release the ON button. Wait for the status light to flash orange, and then flash green or red.

2. Press and release the ON button 20 times. The status light starts rapidly flashing green and red.

3. Press and hold the ON button for 4 seconds. The status light will turn orange for 1 second, and then start flashing green or red.

4. Press OFF.

</tbody>
</table>
The VuQube can be secured to an object using a padlock and cable (Fig. 5).
The VuQube Satellite System has been designed to be maintenance and trouble free.

For optimum signal strength, keep the enclosure clean from dirt, bugs, and other debris. Periodic washing of the enclosure with mild soap and water is recommended.

If you plan on not using your VuQube for long periods of time, it is recommended that the system be put through a search procedure on a quarterly basis to keep all moving parts in good working order.

If you have any comments or questions, please contact the King Controls Service Department at (800) 982-9920, or email King Controls at info@vuqube.com

Rain Fade

Rain or dew on the enclosure can cause signal interference and make the digital picture freeze, pixel or go out altogether. This loss of signal is commonly referred to as “rain fade” and is caused by the combination of water in the atmosphere and water on the enclosure surface.

To minimize this issue and eliminate the effects of water on the enclosure, apply King Controls Dome Magic® rain fade solution to the enclosure. This will prevent water from sticking to the enclosure surface and blocking the signal. For additional details on Dome Magic® rain fade solution please contact your authorized VuQube dealer or call King Controls at (800) 982-9920.

Note: Dome Magic® will discolor black VuQubes or VuQubes painted a dark color.
Every VuQube Satellite System is thoroughly inspected and tested before leaving the factory. It is covered by a one year parts limited warranty from the date of original purchase. This warranty does not cover installation and external wiring or refurbished units.

Should any trouble develop during the warranty period, contact King Controls. Only King Controls may perform warranty evaluations and repairs.

If it is determined that the unit needs to be returned, return COMPLETE product, freight prepaid, to:

**King Controls, 11200 Hampshire Ave. S. Bloomington, MN 55438-2453.** If inspection shows the trouble is caused by defective workmanship or material, King Controls will repair the unit without charge.

This warranty does not apply where:

- The product has been abused, misused, improperly installed or improperly maintained.
- Repairs have been made or attempted by others.
- Repairs are required because of normal wear and tear.
- Alterations have been made to the product.

**In no event shall King Controls be liable for any indirect, incidental, or consequential damages from the sale or use of the product. This disclaimer applies both during and after the term of the warranty.**

King Controls disclaims liability for any implied warranties, including implied warranties of “merchantability” and “fitness for a specific purpose,” after the one year term of this warranty.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.
