

Wireless Genie Mini

MODEL C41W

INSTALLATION GUIDE

OVERVIEW

See the panels that follow for complete instructions.

This Installation Guide will show you how to connect your **DIRECTV® Wireless Genie Mini Client (“WGM”)** to your **Genie HD DVR**.

1. Set up the WGM at its location.
2. Verify wireless network connection & signal strength.
3. Add the WGM Client.
4. Finish the Add a Client setup.
5. Confirm the Client(s) on your Genie HD DVR & Enjoy DIRECTV!

You can also find more information online at directv.com/wirelessgeniemini.

DIRECTV Wireless Genie™ Mini (C41W) at a Glance

:: NOTE

For new or upgrade DIRECTV WGM orders, each device is shipped with its power supply, an HDMI or other necessary cable, and a Genie Remote Control. However, if you ordered a replacement WGM, it is shipped with a power cord only.

For a list of service and system requirements for using the WGM, please visit directv.com/wirelessgeniemini.

1

Step 1. Set up the Wireless Genie Mini at its location.

- Connect the power cord to the WGM and plug it in to an electrical outlet.
- Connect the HDMI cable between the WGM and your TV.
- Power on the WGM and the TV.

:: NOTE

- The WGM must be placed at least four (4) feet away from the Wireless Video Bridge.*
- Avoid placing your WGM in a location with potential signal interference such as in a room with thick walls/ceilings, or near your home computer network router, cordless phone or metal objects.

:: NOTE

If your TV does not have an HDMI port, you can purchase component or composite cables from a local or online electronics retailer.

* The Wireless Video Bridge was part of your original Genie installation with your Genie HD DVR (HR34, HR44 and above).

2

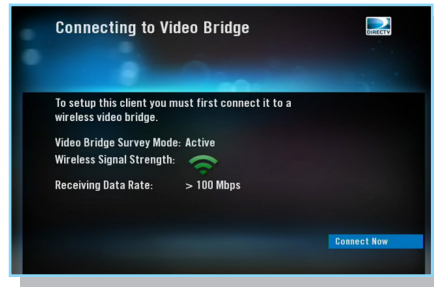

Step 2. Verify Wireless Signal Strength.

Once you turn on your WGM, the Connecting to Video Bridge screen will display:

- Confirm that the Wireless Signal Strength icon displays three (3) GREEN bars.
- Confirm that the LED light on the front of the WGM is GREEN.

:: NOTE

If the Wireless Signal Strength icon on the Connecting to Video Bridge screen and/or the LED on the WGM displays RED, please go to directv.com/wirelessgeniemini for troubleshooting help. Or, call DIRECTV Customer Care at 1-800-531-5000.

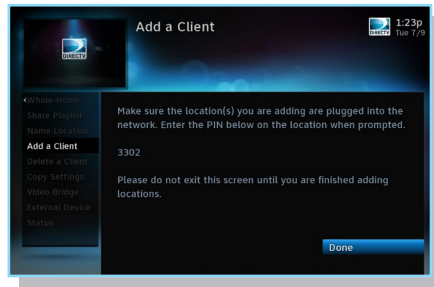

3

Step 3. Start the Add a Client Guided Setup.

Go to the Genie HD DVR to begin the Add a Client guided setup:

- On your Remote, press **MENU**, select **Settings & Help**, select **Settings**, then **Whole-Home**. Then select **Manage Clients**, and then **Add a Client**.
- Note the PIN that displays on the **Add a Client** screen -- you will need to enter the PIN on your WGM at its location.
- Return to the location where you set up your WGM.*

* **IMPORTANT: DO NOT EXIT** the Add a Client screen or press **DONE** on your Receiver when you go to the WGM Client location for setup. Be sure to return to the Receiver within 20 minutes to finish, or the Add a Client setup will time out and you will need to start the setup over.

4

Step 4: Complete adding the WGM at the Client location.

When back at the WGM location:

- Select **Continue**. A two (2) minute countdown will display as the WGM connects to the network.
- The **Enter PIN** screen will display after the connection countdown.
- Using the DIRECTV Genie Remote Control (RC71), enter the PIN you noted in Step 3.
- Follow the onscreen instructions for **Create a Location, Copy Settings, Program Remote Control**, and other options.
- When the **Congratulations** screen displays, select **Watch TV** or **Browse Guide**.

:: NOTE

If the WGM fails to connect (and displays the Enter PIN screen again) after the two-minute connection countdown, please call DIRECTV Customer Care at 1-800-531-5000.

*** IMPORTANT:** If adding multiple WGMs, use the same PIN and complete the connection process for WGM, one at a time, before selecting **DONE** on the Add a Client screen. DIRECTV allows up to eight (8) WGMs per account.

You may also find troubleshooting tips for the Wireless Genie Mini at directv.com/wirelessgeniemini.

5

Step 5: Exit Add a Client mode on the Genie HD DVR to confirm the WGM(s) on your network.

After you are finished adding all Mini Clients (Wireless and Wired) to your network:

- Return to the Genie HD DVR.
- Select **DONE** on the **Add a Client** screen.
- Your Genie network will now operate with the additional WGMs.

:: NOTE

The first time you press EXIT, or select Watch TV or Browse Guide after adding your WGM(s), a software download will occur to deliver the latest features from DIRECTV. This may take a few minutes.

:: NOTE

To move your activated WGM to another room in your home, disconnect the HDMI & power cables, and reconnect at your desired location. Verify a sufficient wireless signal by checking that the WGM's LED Indicator is green.

DIRECTV services not available outside the U.S. DIRECTV programming is available separately and independently of DIRECTV equipment. A valid programming subscription is required to operate DIRECTV equipment. Activate your DIRECTV programming today at 1.800.DIRECTV (1.800.347.3288). The DIRECTV Genie Mini Client requires DIRECTV Whole-Home Service, Advanced Receiver Service, a Whole-Home Network with an Internet-connected DIRECTV Genie HD DVR Receiver (HR34, HR44 and above), and the DIRECTV Wireless Video Bridge already installed by a professional DIRECTV Installation Professional. Visit www.directv.com/technology/wholehome and www.directv.com/technology/genie for more information.

Additional equipment charges apply for each DIRECTV Mini Client. You must activate each new/additional or reactivated Mini Client on your existing account by calling DIRECTV Customer Care at 1-800-531-5000. Connection speeds and signal strength vary, depending on your Internet Service Provider (ISP). Check with your ISP to confirm your home network speeds. © 2013 DIRECTV.
