

# HFS-2P/2150

## 2150 MHz 90 dB EMI Satellite Splitters

### Features

- High-frequency range 900 MHz to 2150 MHz L-Band suitable for analog and digital satellite applications
- HFS series provide DC power passage to one port while blocking DC power to all other ports for improved hum modulation and Intermodulation performance. HFS-P series provide DC power passage to all ports for remote LNB-powering applications and powering the antenna preamplifier directly from the headend
- High-performance printed board circuitry provides improved hum modulation and intermodulation parameters to ensure superior signal quality
- Yellow-chromate plated zinc-alloy diecast housing ensures excellent ground bonding and long corrosion-free service life in indoor/outdoor applications
- Epoxy-sealed back cover provides effective EMI-RFI shielding > -70 dB, eliminating signal ingress to provide distortion-free pictures
- 1-inch centered 3/8" long precision machined F-connector threads ensure improved port-to-connector interface and accommodate external security devices
